

Jivestor

Quick Features Review

Demo account

To test all platform features you can simply create a demo account by the following link: <https://demo.jivestor.com/registration>

Strategy Followers

We integrate and synchronize our platform with trading terminal of brokerage company. User don't need to keep own PC running to copy trades.

Web-terminal

It enables to monitor charts and trades in real-time mode and allows trading in the financial markets directly from website.

Portfolio

Users can add various trading strategies to portfolio and customize flexible copying settings. Newbie users can use “Automatic settings adjustment” option.

Reports

System of reports allows your clients to view charts showing return of every strategy provider and look through their history of trades. Reports can be grouped by multiple selected traders.

Portfolio wizard

User is encouraged to automatically build an investment portfolio based on TOP strategies during registration. Our system will customize favorable settings in an automatic mode for you clients.

Demo account

Users can test our service on a demo account during the 30 days before trading with real money. They can specify initial amount, currency and leverage of deposit. Demo account may be extended after its expiration.

Strategies rating

We developed a unique algorithm of ranking trading strategies to identify the most perspective strategies so that they rank high in the rating.

Detailed statistics

This module consists of the most important figures. Charts are drawn based on Equity data and reflects real changes in the funds available on a strategy provider’s account when trades are open (floating profits and losses are taken into account).

Virtual tour

To make it easier for users to work with our platform straight after registration, we offer them to watch our virtual tour where basic steps to start copying strategies are shown.

Socialization

Strategy followers may share their experience of copying trades opened by strategy providers and leave their feedback. Besides, we offer an additional rating which is based on the opinions of users.

Strategy Providers

Strategy providers may share their trades by connecting accounts opened with various brokerage companies. They don't need to change their brokers in order to transmit their trades to your white labeled platform. That is how decentralization is achieved.

Strategy hosting

One need to enter account number and investor password to connect to a strategy. Our software will automatically connect to a strategy provider's account, upload trading history and calculate statistical parameters of trading strategy.

Reports

Strategy providers have an opportunity to monitor their followers, see data on their trading volumes and returns.

Balance

Funds are credited to account balance of a signal provider on our website once a month and may be then withdrawn via various payment systems (to a trading account, through a bank, Skrill, PayPal, etc.).

Mobile App

We offer mobile applications which your customers can install on their phones.
Additionally, our website is fully customized for tablets.
